About us

Our Mission

With the rapid advancement of AI and evolving global industries, the younger generation's future is marked by "uncertainty." The OECD and McKinsey & Company have both emphasized that critical thinking is essential for the future workforce but is currently underdeveloped. Ascent Academy was founded to cultivate young leaders capable of navigating this uncertainty and addressing global challenges.

Our approach focuses on developing critical thinking through English-based debate, reading, and writing. Rather than rote memorization, we center our curriculum on global social issues, encouraging logical reasoning, analysis, and discussion. We partner with social organizations for high school students to offer leadership programs that integrate soft skills and real-world project implementation, fostering both practical and social impact.

Our teachers, with diverse international backgrounds, genuinely care about students' growth. Beyond academic training, we help students discover their potential and self-worth, guiding them to become future leaders with a mission to change the world.
